Conductive Warming For Veterinary Medicine

adroitmedical.com

Soft-Temp reusable pads are the perfect solution for veterinary warming. They are heavy-duty and can be patched if needed. Available in 4 sizes, the pads fit table-tops, surgery tables and in kennel cages. Soft-Temp pads work best with Adroit's HTP-1500 pump, but adapters are available should you have a different pump\*. Pads may be used directly against the skin or covered with pillow cases or light-weight fabric for added protection against damage.

**V029 Medium**

**VKIT Patch Kit**
